INDEX TO VOLUME 9, FOREST SCIENCE, 1963

Art.—article; rev.—review; art. (rev.)—review of article or book by.

Authors are indicated by capitals.

Absorption and translation of the triethylamine salt of 2,4-D and 2,4,5-T in four woody species. art. 485
Acorn germination of four southern oaks, effects of soaking in water on. art. 236
ALLEN, G. S. art. 386
Ambrosia beetle, trypodendron. Douglas-fir sapwood starch in relation to log attack by. art. 430
Anatomy of heat-damaged Douglas-fir seedlings. art. 15
Anthracene technique for evaluating canopy density following application of herbicides. art. 339
Aspen, quaking. Ceratocystis fimbriata, the cause of a stem canker of. art. 232
Aspens. Induction of hypoxylon cankers in. By artificial inoculation. art. 2
Assessment of log class volumes within trees by probit transformation, the. art. 289
Assets, timber and other. Concepts of financial maturity of. rev. 107
Automatic sub-irrigation sand culture apparatus, an. art. 63
Bark saprophytes, further effects of. On hypoxylon canker. art. 263
BARNES, ROBERT L. art. 98
BARON, FRANK J. art. 217
BARRETT, JOHN W. rev. 7
BENSELER, ROLF W. art. 217
Bibliography on forest genetics and forest tree improvement 1958-59, a. rev. 343
BICKFORD, C. ALLEN. art. (rev.) 262
BIER, JOHN E. art. 263
BLACK, PETER E. art. 137
BOYCE, STEPHEN G. art. 315
Breeding, plant. Mutation and. rev. 216
BRENDER, ERNST V. art. 8
British Columbia conifers, shoot growth patterns of some. art. 73
British Commonwealth, exotic forest trees in the. rev. 32
BRYAN, W. C. art. 270
BUCHMAN, Roland G. art. 477
CAMPBELL, ROBERT K. art. 444
Canopy density following application of herbicides, anthracene technique for evaluating. art. 339
Caribbean pine, nutrient supply and mycorrhiza development in. art. 405
CARL, C. M., JR. art. 202
Causes of the winter decline in transpiration and photosynthesis in some evergreens. art. 158
Ceratocystis fimbriata, the cause of a stem canker of quaking aspen. art. 232
Change of chemical reserves in germinating Douglas-fir seed. art. 226
CHAPMAN, J. A. art. 430
Chemical reserves in germinating Douglas-fir seed, change of. art. 226
CHING, TE MAY. art. 226
Chloropicrin, formalin and. Partial sterilization of Douglas-fir seedbeds with. art. 330
Climate and soil, some factors of. Affecting establishment of loblolly pine stands. art. 130
CLUTER, JEROME L. art. 354
Comparison of stand density measures for loblolly pine cubic-foot growth prediction. art. 8
Compatible growth and yield models for loblolly pine. art. 344
Concepts of forest entomology. rev. 337
Cone-scale necrosis and seed damage associated with attacks by Douglas-fir cone midges. art. 44
Correlation, phenotypic. Among branch and upper-crown stem attributes in Douglas-fir. art. 444
CRAM, W. H. art. 279
DEETLEFS, P. P. DuT. art. 289
Defect reduction in hardwood logs, evaluating the benefit of. art. 315
Dendrometers, optical. For out-of-reach diameters: a conspectus and some new theory. For Sci, Monog. 4 (a separate)
Determining fiber length, fibrillar angle and springwood-summerwood ratio in slash pine. art. 181
Distribution and effects of pack-pine budworm defoliation. art. 146
Douglas-fir, origin and development of the ovule in. art. 386
Douglas-fir cone midges, attacks by. Cone-scale necrosis and seed damage associated with. art. 44

Douglas-fir forest, net precipitation under a. art. 423
Douglas-fir in Scandinavia and U. S. compared. rev. 85
Douglas-fir, phenotypic correlation among branch and upper-crown stem attributes in. art. 444
Douglas-fir sapwood starch in relation to log attack by the ambrosia beetle, trypodendron. art. 430
Douglas-fir seed, change of chemical reserves in germinating. art. 226
Douglas-fir seedlings, heat-damaged. Anatomy of. art. 15
Drought, the indirect effect of. On tracheid diameter in red pine. art. 52
DUFFIELD, JOHN W. art. (rev.) 7
DUNCAN, Donald P. art. 146
Econometrics, an introduction to. rev. 106
Economic analysis of three pine release experiments in Northern Minnesota, an. art. 242
Effect of herbicide (dosage, and volume on hazel brush at different foliar stages. art. 477
Effects of pruning on rainfall interception in a Minnesota red pine stand. art. 452
Effects of soaking in water on acorn germination of four southern oaks. art. 236
Entomology, forest. Concepts of. rev. 337
ERICKSON, HARVEY D. art. (rev.) 105
Evaluating complex investments in forestry and other long-term enterprises using a digital computer 496
Evaluating the benefit of defect reduction in hardwood logs. art. 315
Exotic forest trees in the British Commonwealth. rev. 32
FARRIS, S. H. art. 430
FEDKIW, JOHN. art. (rev.) 496
Fiber length, fibrillar angle and springwood-summerwood ratio in slash pine, determining. art. 181
Fibers, gelatinous. In the roots of quaking aspen. art. 440
Fifth year results of vacuum-drying storage and additives on the viability of some conifer pollens. note 96
Financial maturity of timber and other assets. Concepts of. rev. 107
FLORA, DONALD F. art. (rev.) 107
Floral initiation and development in quaking aspen. art. 323
Forest entomology, concepts of. rev. 337
Forest products, their sources, production, and utilization. rev. 105
Forestry Theses accepted by by colleges and universities in the United States. Supplement July 1961-June 1962. index 372
Formalin and chloropicrin, partial sterilization of Douglas-fir seedbeds with. art. 330
FOWELLS, H. A. art. (rev.) 32
FOX, IRVING K. art. (rev.) 491
FRENCH, D. W. art. 232
Fungal symbionts, isolation of, from pine mycorrhizae. art. 270
Further effects of bark saprophytes on hypoxylon canker. art. 263
GAFFNEY, M. MASON. rev. 107
GARY, HOWARD L. art. 311
Gelatinous fibers in the roots of quaking aspen. art. 440
Geographic overlap of noble fir and red fir, The. art. 207
Geographic variation in ponderosa pine leader growth. art. 86
Germination and growth of three tree species under four photoperiods. art. 279
GHENT, A. W. art. 295
Gibberellin, long-term effects of. On the growth of loblolly pine seedlings. art. 202
GLOCK, WALDO S. et al. rev. 329
GRAHAM, KENNETH. rev. 337
Grand fir, a mathematical approach to polymorphic site index curves for. art. 167
Great Lakes basin, The. rev. 491
GROSENBAUGH, L. R. For. Sci. Monog. 4 (a separate)
GOVER, R. Art. 493
Growth and yield of hypothetical ponderosa pine stands under different thinning regimes. Theoretical. art. 33
Growth components of slash pine, parameters of site in certain. rev. 335
Growth layers, uniformity among. In three ponderosa pines. rev. 329
Growth of four northern conifers under long and natural photoperiods in Florida and Wisconsin. art. 115
Growth of white spruce in the nursery. art. 68
HAIG, I. T. art. (rev.) 103
HALL, O. F. rev. 496
HANOVER, JAMES W. art. 86
HANSEN, J. H. art. 470
Hardwood logs, evaluating the benefit of defect reduction in. art. 315

Hazel brush at different foliar stages. Effect of herbicide, dosage, and volume on. art. 477
Heat-damaged Douglas-fir seedlings, anatomy of. art. 15
HEINSELMAN, M. L. note 336
HELLMERS, HENRY. art. 189
Herbicide, dosage, and volume. Effect of. On hazel brush at different foliar stages. art. 477
Herbicides, application of. Canopy density following. Anthracene technique for evaluating. art. 339
HODSON, ALEXANDER C. art. 146
HOOKE, ROBERT. rev. 262
Hybrids, pine. Sex transformation in. art. 258
Hypoxylon canker. Further effects of bark saprophytes on. art. 263
Hypoxylon cankers in aspens. Induction of. By artificial inoculation. art. 2
Increment, annual. Vertical distribution of. In thinned ponderosa pine. art. 394
Indian forestry, one hundred years of. rev. 103
Indirect effect of drought on tracheid diameter in red pine, The. art. 52
Induction of hypoxylon cankers in aspens by artificial inoculation. art. 2
Inference, scientific. Introduction to. rev. 262
Initial root development of ponderosa pine seedlings as related to germination date and size of seed. art. 456
Introduction to econometrics, an. rev. 106
Introduction to scientific inference. rev. 262
Investigations on the flowering and seed of pinus silvestris. rev. 476
Isolation of fungal symbionts from pine, mycorrhizae. art. 270
Jack-pine budworm defoliation, distribution and effects of. art. 146
JACKSON, D. S. rev. 335
JAGELS, RICHARD. art. 440
Jeffrey pine seedlings, some temperature and light effects in the growth of. art. 189
JOHNSON, NORMAN E. art. 44
JURBERGS, K. A. art. 181
KARLBERG, STEN. rev. 85
KINGHORN, J. M. art. 430
KLEIN, LAWRENCE R. rev. 106
KRAMER, P. J. art. 202
KRUGMAN, STANLEY L. art. 217
KULMAN, HERBERT M. art. 146
LANNER, RONALD M. art. (rev.) 476
LARSEN, HARRY S. art. 236
LARSON, M. M. art. 456
LARSON, PHILIP R. art. 52
For. Sci. Monog. 5 (a separate)
Leader growth, ponderosa pine. Geographic variation in. art. 86
Leader growth of young pitch and shortleaf pines. art. 344
Leaf blight of some plains tree species. The role of 2,4-D in the appearance of a. art. 283
LEMON, PAUL E. art. 33
LESTER, DONALD T. art. 323
LINDQUIST, C. H. art. 279, 493
Loblolly pine, compatible growth and yield models for. art. 344
Loblolly pine cubic-foot growth prediction, comparison of stand density measures for. art. 8
Loblolly pine seedlings, long-term effects of gibberellin on the growth of. art. 202
Loblolly pines, establishment of. Some factors of climate and soil affecting. art. 130
Log class volumes, the assessment of. Within trees by probit transformation. art. 289
Long-term effects of gibberellin on the growth of loblolly pine seedlings. art. 202
LOTAN, JAMES E. art. 497
LUTZ, H. J. art. (rev.) 206
MARTIN, E. W. art. 493
Mathematical approach to polymorphic site index curves for grand fir, a. art. 167
Maturity, financial. Of timber and other assets. Concepts of. rev. 107
Maturity and storage of Siberian elm seed. art. 493
McCLURKIN, D. C. art. 108
McGEE, CHARLES E. art. 461
McGREGOR, WM. H. DAVIS. art. 115
McMAHON, ROBERT O. art. rev. 107
McVEAN, DONALD N., and DEREK A. RATCLIFFE. rev. 206
MERGEN, FRANCOIS. art. (rev.) 216, art. 258
Method for evaluating the effects of topography on the soil water balance, A. art. 413
Midges, Douglas-fir cone. Cone-scale necrosis and seed damage associated with attacks by. art. 44
Models, comparable growth and yield. For loblolly pine. art. 344
MUELDER, D. W. art. 470
MULLIN, R. E. art. 68

Mutation and plant breeding. rev. 216
Mycorrhizae, pine. Isolation of fungal symbionts from. art. 270
Mycorrhizae development in Caribbean pine, nutrient supply and. art. 405
MYERS, CLIFFORD A. art. 394
NASH, ANDREW J. art. 413
NELSON, THOMAS C. art. 8, art. (rev.) 329
Net precipitation under a Douglas-fir forest. art. 423
NICHOLSON, D. C. art. 339
Nitrogen compounds, organic. In tree xylem sap. art. 98
Noble fir and red fir, the geographic overlap of. art. 207
Northern conifers, growth of four. Under long and natural photoperiods in Florida and Wisconsin. art. 115
Nursery, growth of white spruce in the. art. 68
Nutrient supply and mycorrhiza development in Caribbean pine. art. 405
Nutritional study of slash pine seedlings grown in sand culture, A. art. 461
Oaks, four southern. Effects of soaking in water on acorn germination of. art. 236
One hundred years of Indian forestry. rev. 103
Optical dendrometers for out-of-reach diameters: a conspectus and some new theory. For. Sci. Monog. 4 (a separate)
Organic nitrogen compounds in tree xylem sap. art. 98
Origin and development of the ovule in Douglas-fir. art. 386
ORR, LESLIE W. art. (rev.) 337
OSBORN, KATHERINE H. comp. 372
Ovule in Douglas-fir, origin and development of. art. 386
PALLAS, JAMES E., JR. art. 485
Parameters of site in certain growth components of slash pine. rev. 335
PARKER, EUGENE L. art. 207
PARKER, JOHNSON. art. 158
Partial sterilization of Douglas-fir seedbeds with formalin and chloropicrin. art. 330
Pathology of trees and shrubs with special reference to Britain. rev. 322
PATTON, R. F. art. (rev.) 322
PEACE, T. R. rev. 322
Phenotypic correlation among branch and upper-crown stem attributes in Douglas-fir. art. 444
PHIPPS, Howard M. art. 283
Photoperiods. Germination and growth of three tree species under four. art. 279
Photoperiods, long and natural. Growth of four northern conifers under. In Florida and Wisconsin. art. 115
PINCUS, HOWARD J. rev. 491
Pine hybrids. Sex transformation in. art. 258
Pinus radiata. rev. 188
Pinus silvestris, investigations on the flowering and seed of. rev. 476
Pitch and shortleaf pines. young. Leader growth of. art. 344
Plains tree species. The role of 2,4-D in the appearance of a leaf blight of some. art. 283
Plant communities of the Scottish Highlands. rev. 206
Pleistocene trees and shrubs from Itasca County, Minnesota. A record of some. note 336
Pollens, conifer. Fifth year results of vacuum-drying storage and additives on the viability of some. note 96
Polymorphic site index curves for grand fir, a mathematical approach to. art. 167
Ponderosa pine from four California nurseries, variation in the root regenerating potentials of. art. 217
Ponderosa pine, vertical distribution of annual increment in thinned. art. 394
Ponderosa pine leader growth, geographic variation in. art. 86
Ponderosa pine seedlings, initial root development of. As related to germination date and size of seed. art. 456
Ponderosa pine stands, hypothetical. Theoretical growth and yield of. Under different thinning regimes. art. 33
Ponderosa pines, uniformity among growth layers in three. rev. 329
Precipitation, net, Under a Douglas-fir forest. art. 423
Probit transformation, the assessment of log class volumes within trees by. art. 289
Problems of sampling precision and seedling distribution. (Studies of regeneration in forest stands devastated by spruce budworm. III.) art. 295
Pruning, effects of. On rainfall interception in a Minnesota red pine stand. art. 452
Quaking aspen, floral initiation and development in. art. 323
Quaking aspen, gelatinous fibers in the roots of. art. 440

Rainfall interception in a Minnesota red pine stand, effects of pruning on. art. 452
RAO, V. S., et al. rev. 103
Record of some pleistocene trees and shrubs from Itasca County Minnesota, A. note 336
Red fir, the geographic overlap of noble fir and. art. 207
Red pine, tracheid in. The indirect effect of drought on. art. 52
Red pine, 20-year-old. Shoot and needle responses of. To current soil moisture regimes. art. 497
REDISKE, J. H. art. 339
Redwood seed, testing of. For silvicultural research by X-ray photography. art. 470
Release experiments in Northern Minnesota, an economic analysis of three pines. art. 242
Regional silviculture of the United states. rev. 7
RICHARDS, B. N. art. 405
ROBERTS, B. R. art. 202
ROE, EUGENE I. note 336, art. 477
Role of 2,4-D in the appearance of a leaf blight of some plains tree species, The. art. 283
Root development, initial. Of ponderosa pine seedlings as related to germination date and size of seed. art. 456
Root distribution of five-stamen tamarisk, seepwillow, and arrowweed. art. 311
Root regenerating potentials of ponderosa pine from four California nurseries, variation in the. art. 217
ROTHACHER, JACK. art. 423
ROWAT, MARIAN H. art. 263
Sampling precision and seedling distribution, problems of. (Studies of regeneration in forest stands devastated by the spruce budworm. III.) art. 295
Sand culture, a nutritional study of slash pine seedlings grown in. art. 461
Sand-culture apparatus, an automatic subirrigation. art. 63
Sap, tree xylem. Organic nitrogen compounds in. art. 98
SARVAS, RISTO. rev. 476
SCHOENIKE, R. E. note 96
SCHROEDER, JAMES G. art. 315
SCHUBERT, GILBERT H. art. 217
SCHUMACHER, F. X. art. 33, 289
Scientific inference, introduction to. rev. 262
SCOTT, C. W. rev. 188
Scottish Highlands, plant communities of the. rev. 206
Seed, redwood. Testing of. For silvicultural research by x-ray photography. art. 470
Sex transformation in pine hybrids. art. 258
SHEA, KEITH R. art. 2
Shortleaf pines, young pitch and. Leader growth of. art. 344
Shoot and needle responses of 20-year-old red pine to current soil moisture regimes. art. 497
Shoot growth patterns of some British Columbia conifers. art. 73
Siberian elm seed, maturity and storage of. art. 493
SILEN, ROY R. art. 15
Silviculture of the United States, regional. rev. 7
Slash pine. Determining fiber length, fibrillar angle and springwood-summerwood ratio in. art. 181
Slash pine, parameters of site in certain growth components of. rev. 335
Slash pine seedlings grown in sand culture, a nutritional study of. art. 461
SMITH, FRANK H. art. 15
Soil moisture regimes, current. Shoot and needle responses of 20-year-old red pine to. art. 497
Soil water balance, a method for evaluating the effects of topography on the. art. 413
Soil-site index predictions for white oak in North Mississippi and West Tennessee. art. 108
Some factors of climate and soil affecting establishment of loblolly pine stands. art. 130
Some temperature and light effects in the growth of Jeffrey pine seedlings. art. 189
SOOS, J. art. 73
STAEBLER, G. R. art. (rev.) 85, art. 339
STAGE, ALBERT R. art. 167
Stand density measures for loblolly pine cubic-foot growth, prediction, comparison of. art. 8
Starch, Douglas-fir sapwood. In relation to log attack by the ambrosia beetle, trypodendron. art. 430
Stem canker of quaking aspen. Ceratocystis fimbriata, the cause of a. art. 232
Stem form development of forest trees. For. Sci. Monog 5 (a separate).
STEWART, D. M. note 96

STONE, EDWARD C. art. 217
Storage, maturity and. Of Siberian elm seed. art. 493
STREETS, R. J. rev. 32
Studies of regeneration in forest stands devastated by the spruce budworm. III. Problems of sampling precision and seedling distribution. art. 295
Sub-irrigation sand culture apparatus, an automatic. art. 63
SWAN, H. STEWART D. art. 63
Tamarisk, five-stamen. Seepwillow and arrowweed. Root distribution of. art. 311
Tatra National Park, treatises concerning the. rev. 225
TEEGUARDEN, DENNIS E. art. (rev.) 106
Temperature and light effects in the growth of Jeffrey pine seedlings, some. art. 189
TEPPER, HERBERT B. art. 344
Testing of redwood seed for silvicultural research by X-ray photography. art. 470
Theoretical growth and yield of hypothetical ponderosa pine stands under different thinning regimes. art. 33
Theses, forestry. Accepted by colleges and universities in the United States. Supplement July 1961-June 1962. index 372
THORUD, DAVID B. art. 452
Timber and water resource management. art. 137
Topography, the effects of. On the soil water balance. A method for evaluating. art. 413
Tracheid diameter in red pine. The indirect effect of drought on. art. 52
Transpiration and photosynthesis in some evergreens, causes of the winter decline in. art. 158
Triethylamine salt of 2,4-D and 2,4,5-T, absorption and translocation of the. In our woody species. art. 485
TROUSDELL, KENNETH B. art. 130
Uniformity among growth layers in three ponderosa pines. rev. 329
Utilization. Forest products, their sources, production, and. rev. 105
Vacuum-drying storage and additives, fifth year results of. On the viability of some conifer pollens. note 96
VAN DEN DRIESSCHE, R. art. 330
Variation in the root regenerating potentials of ponderosa pine from four California nurseries. art. 217
Vertical distribution of annual increment in thinned ponderosa pine. art. 394
WAHLENBERG, W. G. art. (rev.) 188
WALTERS, J. art. 73
Water resource management, timber and. art. 137
WATT, RICHARD F. art. 115
WENGER, KARL F. art. 130
WEST, WILLIAM I. comp. 372
White oak in North Mississippi and West Tennessee, soil-site index predictions for. art. 108
White spruce in the nursery, growth of. art. 68
WILSON, G. L. art. 405
Winter decline in transpiration and photosynthesis in some evergreens, causes of. art. 158
WOOD, FRANCIS A. art. 232
X-ray photography. Testing of redwood seed for silvicultural research by. art. 470
YODER, RAY A. comp. 372
ZAHNER, ROBERT. art. 497
ZAK, B. art. 270
